EXPERIENCE

Verigo: iOS Developer (Objective-C) 2012 - 2015

▶ Fourth employee at a startup developing supply-chain visualization technology under a SaaS model

▶ Developed an application to interface with proprietary sensor devices via Bluetooth 4.0 technology

▶ Employed Agile Development and Scrum practices to manage project requirements and drive progress

▶ Implemented major UI/UX overhaul in collaboration with external graphic designers

PROJECTS

Simpoll: YHack 2015 (Swift)

▶ Simple polling app for crowdsourcing basic decisions

▶ Used AFNetworking to communicate with a server via a Restful API

▶ Designed and implemented UI and logo using Sketch

▶ Collaborated on a team of four to deliver a complete native app with web portal and backend in under 24 hours

RBC Wallet Redesign: Class Project (Sketch3 + Invision)

▶ Conducted user research and concept testing for a redesign of Royal Bank of Canada's Mobile Wallet application

▶ Developed mockups and wireframes for user-focused designs based on usability and experience feedback

▶ Built an interactive prototype using Invision for hands-on demos

▶ Worked with a representative from RBC to ensure quality of work and satisfaction of client needs and expectations

RPG Pirate Game: Class Project (Java)

▶ Worked on a team to develop an RPG game in Java

▶ Designed and built many of the GUI elements using Swing

SurveySays.co: Swamphacks 2016 (PHP)

▶ Built an Wordpress instance and an automated PHP backend with one team member at Swamphacks

▶ Leveraged AWS's Mechanical Turk API to provide very low cost usability testing for websites

▶ Developed a full-featured business plan and stretch goals to extend the service in the future for bringing additional value
